

CREATING OPTIMAL HEALTH

HAIR ANALYSIS \$40

As long as there is a heartbeat, positive and negative energy is produced in the body. When analyzing the hair through a full-body analysis using a muscle response technique, weaknesses in the body's system are detected. Through a full body work-up, all major organs, nerves, structural, and chiropractic weakness are assessed. When a weakness is found, it is paired with a specific, strategically selected blend of herbs, which creates balance in the body and allows the body to optimally begin the healing process.

To proceed with a hair analysis please [purchase through our website here first](#) and follow these 3 simple instructions:

COLLECT HAIR SAMPLES

EQUINE

Cut a small snip of mane near the poll, no thicker than a pencil

CANINE

Long Hair – Cut a small snip of hair from the nape of the neck about the size of a quarter.

Short Hair – Using a Q-Tip, swab the inside of the mouth. Place each sample into a Ziplock bag, along with the animal's name and gender, along with the owner's name and contact.

MAIL THE SAMPLES TO:

Nicole's Natural Wellness
186 Red Lane | Gay, GA 30218
